Thanks for joining ViralHosts!

If you haven't joined yet, you can [register free](#) today. Please carefully consider the **one-time offer** that is available on sign up. If you have already joined ViralHosts, please [login](#) with your username and password.

## SECTION 1 : PROMOTIONAL TOOLS

First, we will look at the promotional tools for ViralHosts. There is much more value in ViralHosts than just promoting the service but this is definitely something you should look at as it can significantly **increase your online revenues** if you promote the service the right way. Click 'Promotion Section' and 'Promotional Tools'.

Affiliate Link: [Click Here](#)

**Promotion Section**

Why Promote: [Click here to view information on why to promote and how to make money with this site](#)

View Downline: [Click here to view your complete downline](#)

Promotional Tools: [Click here to get all kinds of promotion tools](#)

You will then have access to an extensive list of promotional material specifically targeted at ViralHosts. You can choose from a **wide range of promotional tools** including your affiliate link of course as well as text links, email copies, signature ads, pop up codes, banner ads, site forms, fast action bonuses, articles, blog reviews, ezine ads, top sponsor ads, safe list ads and so forth. If you are serious about promoting ViralHosts, make sure you follow the steps recommended on the page.

<b>Step #1:</b> <a href="#">Affiliate Link</a>	<b>Step #13:</b> <a href="#">Ezine Ads</a>
<b>Step #2:</b> <a href="#">Importer: Invite Your Personal Contacts</a>	<b>Step #14:</b> <a href="#">Top Sponsor Ads</a>
<b>Step #3:</b> <a href="#">Text Link</a>	<b>Step #15:</b> <a href="#">Safe List Ads</a>
<b>Step #4:</b> <a href="#">Tell-Friend</a>	<b>Step #16:</b> <a href="#">PPC and Google Ads</a>
<b>Step #5:</b> <a href="#">Email Copy</a>	<b>Step #17:</b> <a href="#">InstantBuzz Ads</a>
<b>Step #6:</b> <a href="#">Signature Ads</a>	<b>Step #18:</b> <a href="#">Press Releases</a>
<b>Step #7:</b> <a href="#">Pop Up Codes</a>	<b>Step #19:</b> <a href="#">Turbo Charged Integration</a>
<b>Step #8:</b> <a href="#">Banners</a>	<b>Step #20:</b> <a href="#">ViralCashFusion Facebook Integration</a>
<b>Step #9:</b> <a href="#">Site Forms</a>	<b>Step #21:</b> <a href="#">Quick Autoresponder Profits</a>
<b>Step #10:</b> <a href="#">Fast Action Bonuses</a>	<b>Step #22:</b> <a href="#">Product Download Page Generator</a>
<b>Step #11:</b> <a href="#">Articles</a>	<b>Step #23:</b> <a href="#">Vital Followers Twitter Promotion Tool</a>
<b>Step #12:</b> <a href="#">Blog Reviews</a>	

**Note:** For quick results, make sure you follow step #1, #4, #5, #14, #16, #18 & #21. For great long term results, make sure you follow step #3, #6, #7, #8, #11, #17 and most important: **#9, #10, #19, #20, #21, #22 & #23**

These tools allow you to promote ViralHosts and **start earning your first commissions in no time**. You don't need to know everything about the very features of ViralHosts. The system provides you with all the tools you need to promote the service. No extra effort is required from your side unless you want to customize or personalize any of these tools. If you have any suggestions, make sure you contact the team as they are always keen to update their material to provide their members with the best converting tools.

## SECTION 2 : VIRAL FEATURES

We will now look at adjusting the viral features of ViralHosts. If you like you **can adjust the viral features to fit your needs**. Click 'Hosting Section' and 'Adjust Viral Features'.

Affiliate Link: [Click Here](#)

**Hosting Section**

Log Into Hosting Panel: [Click here to access your hosting panel to manage web sites, email etc.](#)

**Note:** Depending on the amount of new accounts being created at the time, it can take several minutes for your hosting account to be completely setup and ready on our server after your initial signup. We appreciate your patients.

Adjust Viral Features: [Click here to adjust the viral features on your web pages](#)

You will see that you have the option to 'Enable Viral Ads and Earn Cash' and 'Enable Viral Top and Build Your List.' As a free member, these will be automatically 'Yes'. As an upgraded member, you may have the option to set it to 'No', depending on your membership level.

You have the option to choose 'Yes' as well for the 'Viral Top and Build Your List' option. As an upgraded member we suggest you to click on 'Yes' as the **benefits far outweighs**.

You can also see 'Your Total Viral Ads Earnings' and 'You Earn Per 1,000 Visitors To Your Or Your Direct Referral Downline Web Pages.' Once you select the settings, save them by clicking 'Save Settings'.

If you have the chance to be a ViralHosts Diamond or Elite member, you can have access to the 'Enable Viral Branding and Build your List' feature which allows you to remove the ViralHosts branding from your site.

Affiliate Link: [Click Here](#)

**Adjust Viral Features**

Enable Viral Ads & Earn Cash:  Yes  No  
Paid Members Only!

Enable Viral Top & Build your List:  Yes  No  
Paid Members Only!

Enable Viral Branding & Build your List:  Yes  No  
Diamond & Elite Members Only!

**Save Settings**

**Your Total Viral Ads Earnings So Far:**  
\$0.00

**You Earn Per 1,000 Visitor To Your  
Or Your Direct Referral Downline Web Pages:**  
\$0.15

[Increase This Rate: Upgrade Now!](#)

## SECTION 3 : FTP ACCOUNT AND DOMAIN

Now we will look at creating an FTP account and setting up a domain or subdomain with cPanel. Click 'Hosting Section' and 'Log Into cPanel'.

Keep in mind that upgraded members have access to more features than free members, so depending on your membership level, you may not have access to all the features displayed on the previous page. Don't forget that you can upgrade at any time.

### - Set up an FTP account

Before you can access your files, you need to set up an FTP username and password. Go to the 'Files' section and click 'FTP Accounts'. Enter a username and password and choose if you want to give this user access to the root directory or only a specific directory. You may also determine a maximum quota. Then click 'Create FTP Account'.

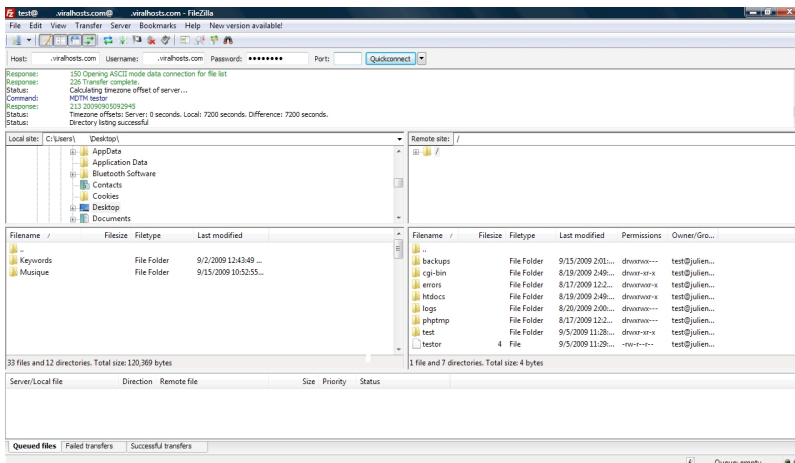

#### Add FTP Account

Form fields and buttons:

- Login:  @ .viralhosts.com
- Password:
- Password Strength:  Very Weak (0/100)
- Password (Again):
- Directory:
- Quota: (MB) unlimited
- 

Now you can either use the **file manager**, or the **FTP client of your choice**. FTP clients such as FileZilla (see below) and SmartFTP are good alternatives to the file manager as they allow you to directly access your FTP, without having to first logging in ViralHosts. You can save your login details so it only takes you a few clicks to access your FTP.

## - Add a domain or subdomain

To add a domain name, go to the Domains section and click 'Addon Domains'. This is only if you have already registered a domain name with a registrar like NameCheap.com or Register.com. If you haven't, you can choose to have a ViralHosts subdomain name by clicking 'Subdomains'.

To add a **domain name**, you first have to make sure that the DNS settings in your registrar are correct. There are two DNS servers you need to point your domain name to:

*ns1.viralhosts.com*

*ns2.viralhosts.com*

It usually takes a little while for registrars to process a DNS change. Once this is done, enter your domain name (without the www.) and your FTP username. You may choose a document root (or leave it as it is). Then choose a password and click 'Add domain!'. The domain will be scheduled for addition.

### Create an Add-on Domain

New Domain Name:

Subdomain/Ftp Username:

Document Root: 

Password:

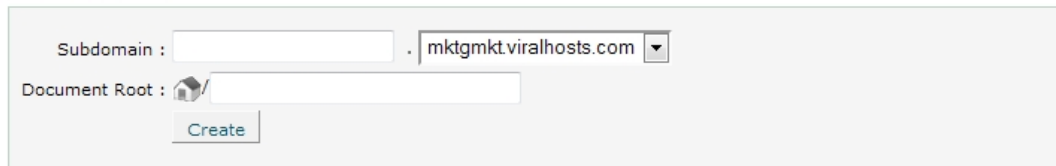

Password Strength:  
  
Very Weak (0/100)

Password (Again):

Hint: This feature must be enabled for your account before you can use it. Addon Domains will not be functional unless the domain name is registered with a valid registrar and configured to point to our DNS servers.

To add a **subdomain name**, simply enter the subdomain name you would like to have. You may choose a target document root. Then click 'Create'. The sub-domain will be scheduled for addition.

#### Create a Subdomain

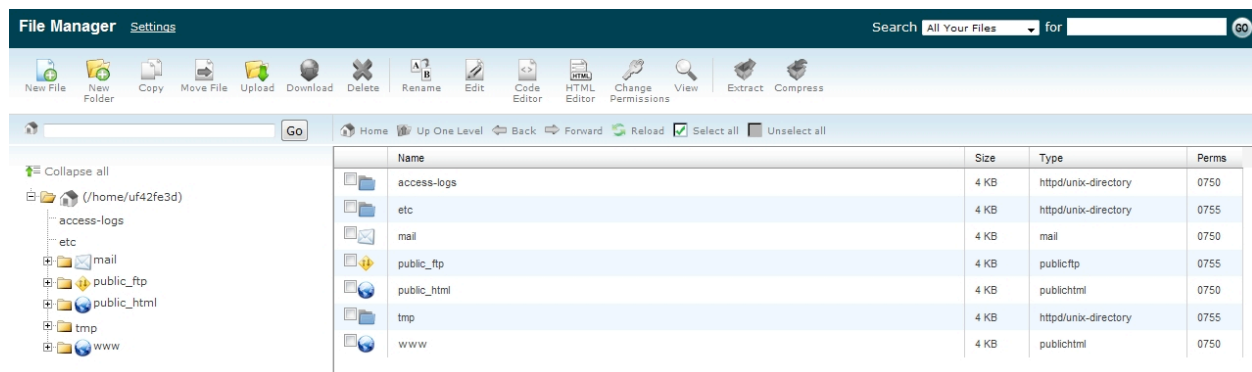

Subdomain :  . mktgmkt.viralhosts.com ▼  
Document Root :  

In both cases, it usually takes a little while for the addition to be processed. Please be patient.

## SECTION 4 : FILE MANAGER

To access the files on your FTP, go to the 'Files' section and click 'File manager'. Select the directory you want to open and click 'Go'. You will then have access to the files that are currently on your FTP. There you can **upload your site from your computer**, or the **HTML files that you have created**. You have the option to create, edit and view pages.

Name	Size	Type	Perms
access-logs	4 KB	http/unix-directory	0750
etc	4 KB	http/unix-directory	0755
mail	4 KB	mail	0750
public_ftp	4 KB	publicftp	0755
public_html	4 KB	publichtml	0750
tmp	4 KB	http/unix-directory	0755
www	4 KB	publichtml	0750

Upgraded members have access to templates that they can use as a base to build their site. To add files on the file manager click 'New file'. To edit a file, select the file you want to edit and click 'Edit'. To view a file, select the file you want to view and click 'View'.

Otherwise you may use the FTP client of your choice like FileZilla or SmartFTP with the login details you have set up as previously explained.

## **SECTION 5 : OTHER SECTIONS**

There are many other features available in the hosting section of ViralHosts (such as the Email Accounts and Site Builder for upgraded members).

If you are familiar with ViralURL, the rest of the site will have no secret for you. If you are not, here is a quick overview:

- **Email section**

In this section you have access to the **downline mailer** as well as the system mailer (Gold, Platinum, Diamond & Elite members only) which allows you to send out emails. You can view your downline, send an email ad, and access the downline mailer and the system mailer. Free and Silver members can view their downline 5 levels deep, Gold, Platinum, Diamond and Elite members can view it 7 levels deep. This section is one of the most important features of ViralHosts, so make sure you take full advantage of it. Remember that you can **email your downline once every 5 to 7 days** and **3,000 to 6,000 random members every 3 days!**

- **Ad Credit Section**

From this section you can manage the viral hosting bar ads, the banner ads, you can claim ad credits coupons, buy ad credits, manage guaranteed visitors and buy guaranteed visitors. This section helps you **generate traffic to your site**, so if that's what you're after, don't miss it!

- **Earnings Section**

This section should get your interest as this is where you can see your **earnings from ViralHosts**. You can see how to earn money with ViralHosts, view your personal referrals, view your referral earnings and see if there is a **referral contest** running (and view all the

information available about the contests, including rankings). Contests can make you win lots of **cash and prizes** so don't miss out on them.

#### - **Upgrade Section**

In this section you can set an email ad, send an email to random members, access your bonuses, view the benefits of every single membership and compare all different types of memberships to have a better view of our offers. Some of these features are only made available to upgraded members. Make sure you compare all the different membership types so you can upgrade to the one that **best suits your needs**.

## **SECTION 6 : UPGRADED MEMBERS**

Upgraded members have a lot more features than free members. These features can be seen on the membership comparison page in the Upgrade section. Take a good look at this page so you can take full advantage of ViralHosts.

For example, upgraded members have access to Email Accounts, WordPress Installer and Site Builder. Let's take a look at the **WordPress Installer** and **Site Builder**, which will guide you through the setup process.

#### - **WordPress Installer**

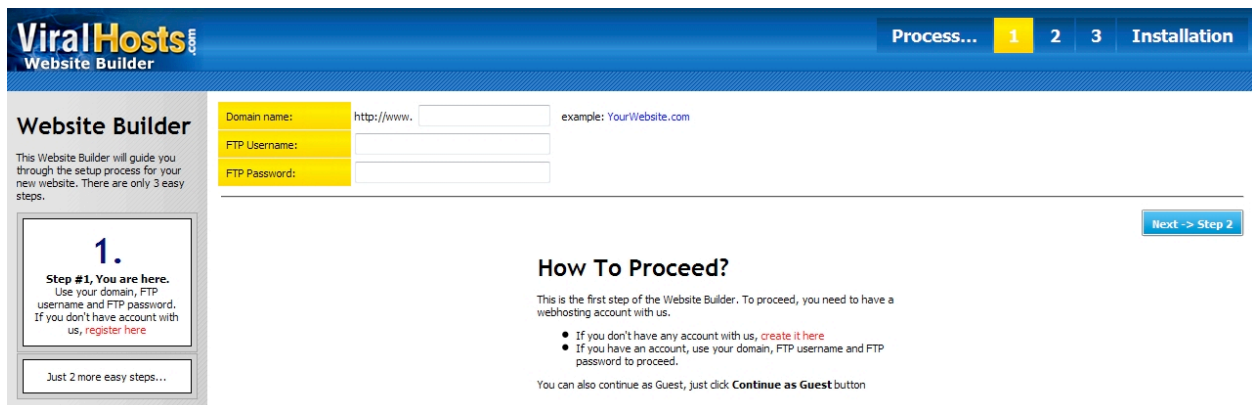

You may install WordPress directly from cPanel, without having to download and upload anything yourself. Simply log into your cPanel, go the 'Software / Services' section and click 'Fantastico De Luxe'. Then select 'WordPress' and click 'New Installation'. Enter the details required and click 'Install WordPress' and 'Finish Installation'.

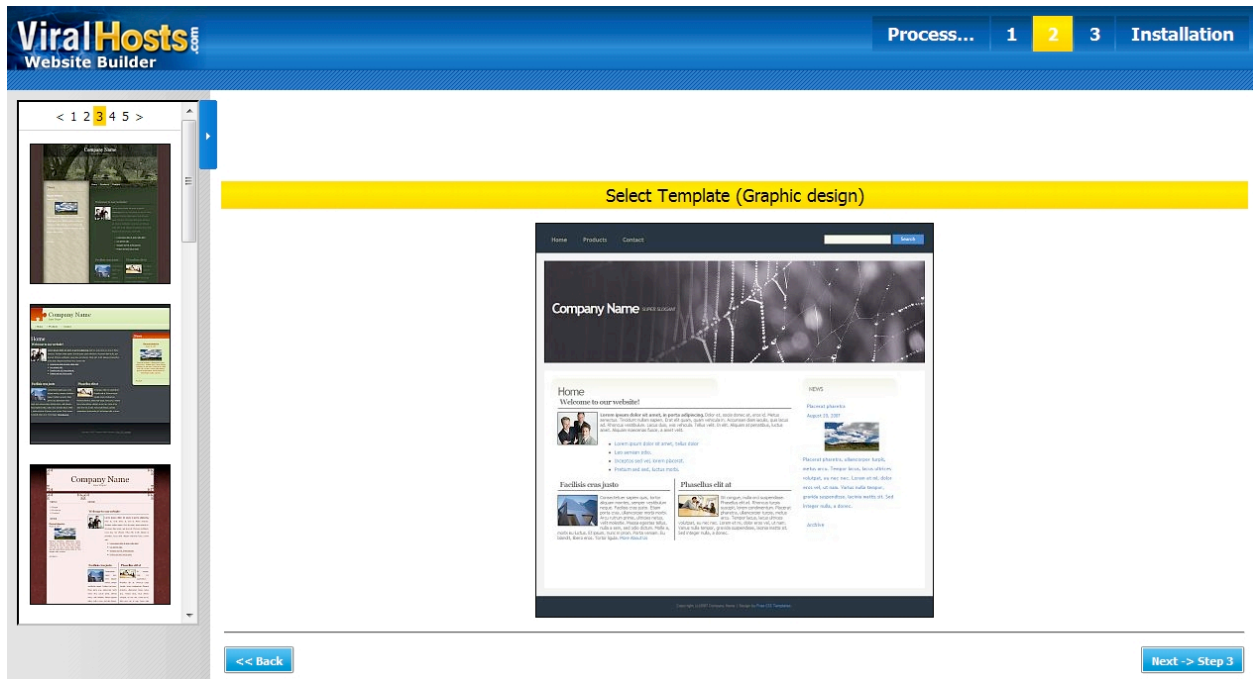

## - Site Builder

The Site Builder will help you set up a site with only little effort. All you need to do is logging into your cPanel, go the 'Software / Services' section and click 'SiteReptile Website Builder'.

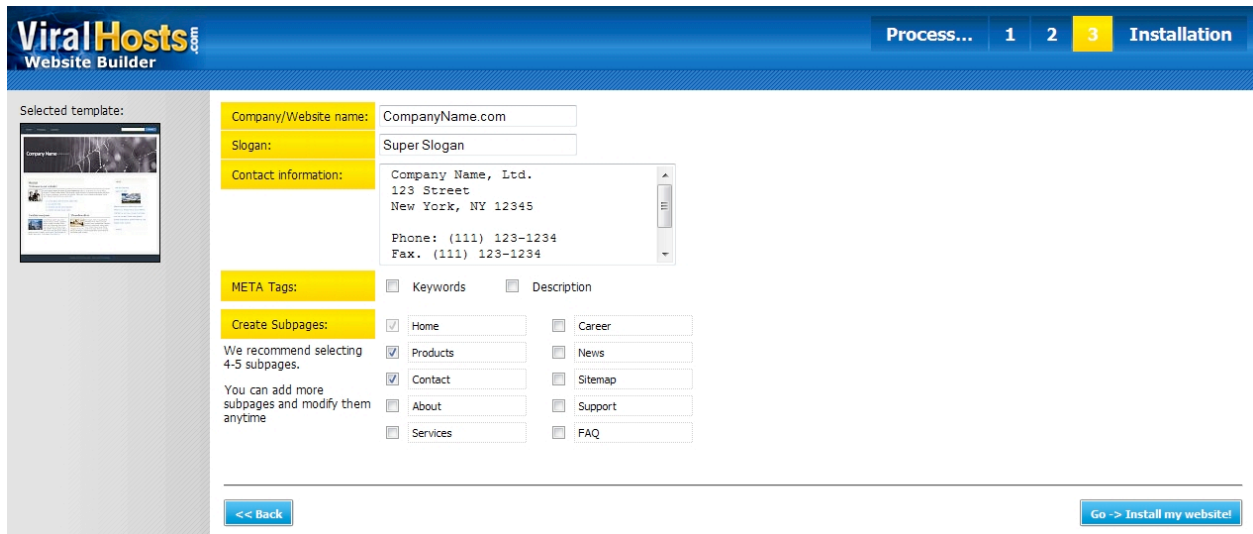

**Step 1:** Enter your domain name and FTP login details and click 'Next'.

**Step 2:** Select the template you like from the list and click 'Next'.

**Step 3:** Enter the website name, slogan, contact information and meta tags, and choose the subpages you would like to have (Products, Contact, etc.). Then click 'Go'.

Your site is currently installing. Please wait a few seconds and click the link to see how your site looks like!

## Important note: license update

Note that you may have to update the license. If you do, follow these instructions:

**Step 1:** Log into Site Builder and replace “sitebuilder” with “upgrade” in the address bar.

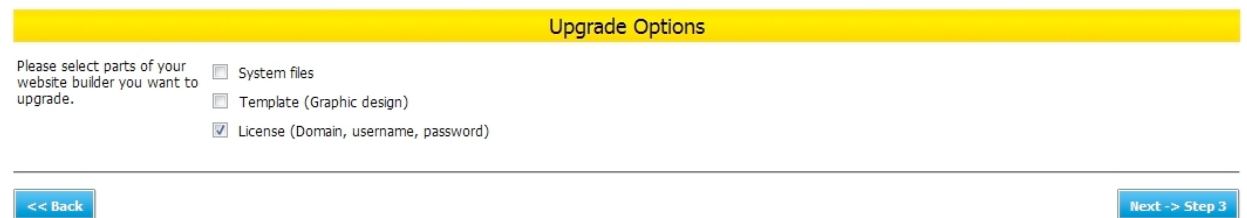

Then enter your login details and click ‘Next’.

**Step 2:** Select ‘License (Domain, username, password)’ and click ‘Next’.

**Step 3:** Enter your own domain on the ‘Domain #3’ field, for example: yoursite.com and click ‘Go’.

Domain #1:

Domain #2:

Domain #3:

(optional)

You can add up to 3 domains to the license  
(example: Company.com,  
Company.net, Company.org)

**Please note:** All domains must point directly to your existing website.
